Aquapharm Chemicals Pvt. Limited

Maxinol 20 CD

Acrylic Polymer

Dispersant for water based paints/ Pigment formulations

PRODUCT FEATURES

M 20 CD is used as efficient pigment dispersant to have stability and good performance under different climatic condition.

M 20 CD is recommended to add with the pigment/water before dispersion to achieve maximum loading of pigment. The dosage level is also low which does not affect gloss of the final paint

The level of M 20 CD is maintained to have in-can stability with optimum performance.

M 20 CD is stable over wide range of pH. The dosage level shall be depending upon the pigment concentration in the slurry. It is used as grinding aid, dispersing and deflocculating aid for pigments for various applications.

SPECIFICATIONS

Appearance	:	Straw to light Amber Liquid
PH	:	6 – 8
Solid Content	:	40 ± 1%
Density	:	1.10 ± 1.25

MAJOR BENEFITS

M 20 CD confers following application benefits:

It is used to overcome troublesome rheological problems from crowding factors influenced by particle size, shape & interparticle attraction which give rise to interparticle friction and formation of agglomerates.

SAFETY AND HANDLING

M 20 CD is generally safe but avoid contact with eyes and prolonged contact with eyes. Do not take internally. In case of contact with skin, wash with plenty of water. In case of contact with eyes, flush with water and get prompt medical attention. Gloves and goggles should be used while handling the product.

STORAGE

M 20 CD is non-flammable, non-combustible. It should be stored under shade. The product should not be exposed to direct sunlight.

PACKING

Rev 02/01-01-06

M 20 CD is available in 220 Kgs/ 50 kgs Polydrum.
